

# SNOW PLOW EDGES -7" CARBIDE SPACKLED SERIES

LONGEVITY | DURABILITY | PERFORMANCE

Tungsten Carbide is an very hard material that will resist abrasion and our 7" series plow blades incorporate a carbide insert and a 2" carbide spackled wear edge.

#### THE BENEFITS:

Up to 20X the hardness, wear and longevity over standard steel blades.

Withstand higher impacts  
Less down time for blade changes.

2" Carbide Spackled Wear Edge for extreme durability

Carbide Insert increase life expectancy.
